
Telix Quality Charter

At Telix, our mission is to help patients with cancer live longer, better quality lives. It is our privilege to serve the global community as we strive to achieve our mission.

We recognise that the foundation for achieving our mission is a willingness and capability to embrace, enable and embed a culture of “Quality” across our organisation. We do this by putting patient safety as our number one priority.

The Quality Culture we strive for is demonstrated by:

- Using our Quality System to drive operational excellence
- Supporting customer needs
- Achieving desired product and process quality attributes
- Addressing patient needs when designing and delivering our products and services

We manufacture using world class techniques and put our products through rigorous quality control.

We partner with manufacturers and suppliers across the value chain who are carefully selected and committed to our strategy, values and corporate citizenship.

Our global Quality function supports patients and patient safety by focusing on the key following obligations:

- Conducting business in compliance with all applicable laws, regulations, and standards
- Ensuring management responsibility and accountability
- Providing appropriate education and training to enable Telix’s people to carry out their work competently
- Actively managing supplier services and maintaining visibility
- Effectively executing quality planning, record-keeping, auditing, and issue management
- Utilising risk-based decision making
- Establishing and maintaining positive benefit/risk profile for Telix’s products

At Telix we understand that Quality is everybody’s responsibility.
