**Job Description: Clinical Project Manager**

**Type: Full Time**

**Location: Australia**

**Date: Immediate**

---

**About Telix Pharmaceuticals Limited**

Telix is an Australian public company (ASX: TLX) headquartered in Melbourne with international operations in Europe, the US and Japan. Our vision is to be a leading, global biopharmaceutical company in the field of “theranostic” radiopharmaceuticals and we are currently developing a portfolio of clinical-stage products that address significant unmet medical needs in oncology and rare diseases.

**About The Role**

Due to an internal promotion, we are currently looking to hire a Clinical Project Manager in Australia. CPMs are responsible for managing all aspects of the quality delivery of clinical research studies (phase 1 to 4) from the planning phase through to study closeout. The role coordinates work streams and cross-functional project teams and is responsible for ensuring that Telix clinical trials within Australia, Asia and Europe are conducted to high global quality and regulatory standards, within the corporate timelines and budget. Key accountabilities include:

- Proactively managing all aspects of the trial process including vendor selection, site feasibility and selection, trial timelines, budgets, resources and vendor relationships
- Developing integrated study management plans with the core project team
- Developing and managing all study-related documents and implementing quality standards
- Monitoring all work performed by the external partners
- Ensuring effective project plans are in place for each trial within trial appropriate SOPs
- Managing risks proactively and leading problem solving and resolution efforts

Some travel will be expected in this role.

**About You**

You possess a minimum of a Masters in life sciences and progressive experience in a similar role for a pharmaceutical/biotechnology company and/or clinical research organisation. You are able to balance competing priorities and can demonstrate an ability to pivot study strategy quickly and lead teams in the right direction. Other desirable attributes include experience in conflict resolution, project management practice, risk management and an understanding of project financials.

You are also open to flexibility in work hours to enable collaboration with global colleagues and stakeholders across the USA, Asia-Pacific and EMEA.

**Why work at Telix?**

We are a dynamic, fast-growing biopharmaceutical company where employees have a shared purpose: to help people with cancer and rare diseases live longer, better quality lives. This is an exciting time for Telix and we are looking for like-minded, passionate professionals to join us on the journey.

No agency submissions will be considered for this role.
