Job Description: Manufacturing CMC Project Manager

Type: Full Time

Location: Indianapolis

Date: Immediate

About Telix Pharmaceuticals Limited

Telix is an Australian public company (ASX: TLX) headquartered in Melbourne with international operations in Europe, the US and Japan. Our mission is to be a leading, global biopharmaceutical company that delivers on the promise of precision medicine through targeted radiation, and we are currently developing a portfolio of clinical-stage products that address significant unmet medical need in oncology and rare diseases.

About The Role

This is a new position to support the continued growth of Telix! The CMC Project Manager will contribute to the achievement of the company's clinical and commercial assets. This individual will be responsible for Clinical-stage programs and project management functions, which includes all Chemistry, Manufacturing, and Controls (CMC) activities for Telix's programs.

- Partner with cross-functional teams as they manage multiple, complex activities across Drug Substance, Drug Product, Supply Chain, Quality, Analytical and Regulatory CMC
- Partner closely with all key stakeholders of the internal Telix team and external CDMOs to develop and maintain integrated project plants to identify/communicate interdependencies as well as critical path activities for the project
- Prepare and maintain project budgets, timelines, and dashboards
- Track the status of all ongoing development/manufacturing activities and present project status updates
- Facilitate budgeting/forecasting/long-range planning activities for assigned projects
- Manage internal and external resources to achieve project milestones

About You

You are an experienced professional with 5 or more years of operational pharmaceutical experience including but not limited to, manufacturing operations, bioprocessing technology, supply chain, CAPEX. Strong technical understanding of manufacturing and product/process development is required along with demonstrated experience in clinical and commercial pharmaceutical project management. You have proven ability to manage cross-functional teams and external partners with high accountability for project delivery and problem resolution. Above all, you are a mission-driven, agile individual with a passion for Telix's values and objectives.

Why work at Telix?

We are a dynamic, fast-growing biopharmaceutical company where employees have a shared purpose: to help people with cancer and rare diseases live longer, better quality lives. We are a passionate group of professionals looking for like-minded people to join us on the journey.

Application deadline is Friday 4 March 2022.

Agency support is not required for this role and no submissions will be considered.
