#### About Telix Pharmaceuticals Limited

Telix is an Australian public company (ASX: TLX) headquartered in Melbourne with international operations in Europe, the US and Japan. Our vision is to be a leading, global biopharmaceutical company in the field of “theranostic” radiopharmaceuticals and we are currently developing a portfolio of late clinical-stage investigational products that address significant unmet medical need in oncology and rare diseases.

#### Description

This is an exciting time for Telix. With the development of our Seneffe manufacturing site underway, we are planning for future hiring needs for the site. Seneffe will serve as the primary EU manufacturing site for Telix’s radiopharmaceutical products and form an integral part of the EU R&D capability.

Over the coming months, we will require Engineers, Quality Specialists and Manufacturing and Operations experts to build our capability in the region. If you are interested in future roles within Telix, please submit an expression of interest (EOI) to [employment@telixpharma.com](mailto:employment@telixpharma.com)

Within your EOI, please include a bio or CV and a covering letter telling us a bit about yourself. To be considered, you will need to demonstrate:

- Progressive experience in a relevant discipline
- Technical, commercial and leadership skills commensurate with your desired role(s)
- Experience within a similar industry (this is a must)
- Tertiary qualifications in a relevant discipline

All expressions of interest will be acknowledged within two weeks of receipt. Please note that we are considering expressions of interest for *future* opportunities in Seneffe. We do not currently have open roles as Telix is in the early stages of development of the facility.

This is an exciting time for Telix. Come join us on our mission to help patients with cancer live longer, better quality lives!
