ACN 616 620 369
Suite 401, 55 Flemington Road
North Melbourne
Victoria, 3051
Australia

Job Description: Senior Pharmacology and Toxicology Manager

Type: Full Time

Location: USA

Date: Immediate

About Telix Pharmaceuticals Limited

Telix is an Australian public company (ASX: TLX) headquartered in Melbourne with international operations in Europe, the US and Japan. Our mission is to be a leading, global biopharmaceutical company that delivers on the promise of precision medicine through targeted radiation, and we are currently developing a portfolio of clinical-stage products that address significant unmet medical need in oncology and rare diseases.

About The Role

As Telix continues to grow, the Senior Pharmacology/Toxicology Manager role has been created to ensure preclinical Pharmacology and Toxicology studies are achieved according to Telix's strategic goals. This includes the management of external vendors and collaborators to plan, design, and conduct relevant studies. This individual will be required at times to attend meetings outside of normal working hours. Other key responsibilities will include:

- Identifying, developing, and implementing the use of suitable in vivo models, in vitro techniques, cell assays or analytical methods to support candidate development.
- Working with regulatory and program management to plan phase-appropriate nonclinical strategy
- Providing nonclinical technical support to other TLX projects

About You

To excel in the role, you have progressive relevant experience in the pharmaceutical or biotechnology R&D industry with time spent in commercial drug development with management of preclinical cell assays and animal models. You have demonstrated expertise in a range of scientific techniques from relevant subject areas such as biochemistry, pharmacology, cancer biology, proteomics, pharmacokinetics, and immunology. You are also well versed in the requirements for nonclinical toxicology and pharmacology in the US/Europe. You're a problem solver with the proven ability to manage conflicting priorities in a busy drug development program. Above all else, you're committed to the vision and mission of Telix.

Why Work at Telix?

We are a dynamic, fast-growing biopharmaceutical company based in Melbourne, Australia that is continuing to grow our presence in the US. In addition to competitive salaries, we offer our employees an annual bonus structure, health and wellness benefits, and the opportunity to build (and hold) equity in the company. You will also be surrounded by an engaged and supportive team of colleagues who all have a shared purpose: to help people with cancer and rare diseases live longer, better quality lives.

Application deadline is Friday 29 April 2022

Agency support is not required for this role and no submissions will be considered.
