Type: Full Time
Location: United States (Eastern Time Zone preferred)
Date: Immediate

About Telix Pharmaceuticals Limited

Telix is an Australian public company (ASX: TLX) headquartered in Melbourne with international operations in Europe, the US and Japan. Our mission is to be a leading, global biopharmaceutical company that delivers on the promise of precision medicine through targeted radiation, and we are currently developing a portfolio of clinical-stage products that address significant unmet medical need in oncology and rare diseases.

About The Role

This is newly created, high-visibility role, critical to Telix's continued growth and future success.

Reporting directly to the *Chief Business Development Officer & General Counsel*, the position will be responsible for managing and developing Telix's global business development function which plays a key role in supporting Telix's diagnostic and therapeutic pipeline expansion initiatives in the radiopharmaceutical sector. The Telix BD function works collaboratively with Telix's Research & Innovation, Clinical Programs, regional commercial and manufacturing teams in identifying, structuring, negotiating and executing business development initiatives across the business.

This is an exciting opportunity for someone with deep BD experience looking to make an impact in the global radiopharmaceuticals sector.

About You

You ideally have a PhD background enabling technical due diligence and ensuring a thorough understanding of the potential and the risks of each opportunity. You are confident in your ability to build and manage a leading-edge business development function, including team, systems and processes, that can leverage Telix's leading position in the sector. You enjoy networking and have demonstrated ability to create and build relationships with internal and external parties. You are well-connected to the global biotech and pharmaceuticals industry - background in oncology, radiopharmaceuticals and/or antibody development will be highly regarded. Above all, you are focussed on continuous growth and development.

Why work at Telix?

We are a fast-growing, ASX200 biopharmaceutical company where employees have a shared purpose: to help people with cancer and rare diseases live longer, better quality lives. This is a dynamic role with significant career and company growth potential.

Deadline for applications is COB Friday 18th February 2022, EST.

Agency support is not required for this role and no submissions will be considered.
