Job Description : Business Process Management Lead

Type : Full-time

Location : Indianapolis

Date : Immediate

About Us

Telix Pharmaceuticals Limited (Telix) is an Australian public Company (ASX: TLX) headquartered in Melbourne with operations in Europe, the United States and Japan. Telix's mission is to be the leading, global radiopharmaceutical company in the field of "theranostic" medicine and the Company is currently developing an extensive early through to commercial stage pipeline of products in prostate, kidney and brain cancer.

About the Role

As a key member of the US Finance Team, the *Business Process Management Lead* will be responsible for defining the systems and solutions to support Telix's growth within the US. Reporting to the CFO, Americas, this role will help lay the groundwork for the Telix America's finance function and is responsible for proactively identifying and translating the needs of the Market to deliver needed solutions, automation and data architecture. The scope of systems includes, but is not limited to, SAP, Concur and Salesforce. This role will also be accountable for developing effective approaches to project management. Other key responsibilities include:

- Working collaboratively with cross-functional teams including Sales and Marketing, Finance and IT, and geographically disperse stakeholders to bring best in class processes and technology to our US Commercial team
- Planning, coordinating and executing system enhancement projects, process improvement initiatives and the roll out various other supporting tools
- Developing a strategic plan of support for operational systems such as SAP and Salesforce
- Defining and driving business and systems requirements, performing impact assessments and ensuring technical solutions meet the need of business operations
- Assessing existing processes and making improvement recommendations

About You

You hold a Bachelors degree in Computer Science, Engineering, Finance or a related field **and/or** have progressive, equivalent practical experience in business/systems. You are confident in leading system implementations and enhancement projects and have experience in designing, configuring and testing SAP modules.

You are an autonomous worker, strong business partner and adept at influencing without authority. You are passionate and comfortable working in a cross-cultural, matrixed environment and enjoy strategizing, planning, and executing projects within cross-functional teams.

Prior experience in pharmaceutical or medical device industry? Bonus!

Why work at Telix?

We are a dynamic, fast-growing biopharmaceutical company working towards a shared mission: to help patients with cancer live longer, better quality lives. This is an exciting time for Telix and we are looking for like-minded, passionate professionals to join us on the journey.

Agency support is not required for this role and no submissions will be considered.
