**Job Description: Director of Clinical Operations**

**Type: Full Time**

**Location: USA**

**Date: Immediate**

---

**About Telix Pharmaceuticals Limited**

Telix Pharmaceuticals Limited (“Telix”, the “Company”) is an Australian public Company (ASX:TLX) headquartered in Melbourne with operations in Europe, the US and Japan. Our mission is to be a leading, global biopharmaceutical Company in the field of “theranostic” radiopharmaceuticals and the Company is currently developing a mid-late stage pipeline of products in oncology and rare diseases.

**About the Role**

Reporting to the *Vice President of Clinical Operations*, this role will be responsible for the leadership and oversight of US clinical study and contributing to the function’s strategy in partnership with the CMO, Vice President of Clinical Operations and other members of the clinical and medical teams. The role will actively manage operations by organising and coordinating the planning, implementation, management, execution, and completion of clinical programs according to applicable laws and regulations and SOPs. This position will also be responsible for the development of clinical operations systems and processes and communicating said processes and the successful completion of studies to internal and external stakeholders.

**About You**

You hold a degree in Life Sciences and can demonstrate progressive experience in a similar environment. Specifically, experience in drug development (Phase 1-3) and with regulatory submissions – ideally key US and EU filings – will be highly regarded. You have a proven track record in managing a clinical research project in accordance with international standards through all stages: from concept development to final study report. You are a confident communicator and comfortable acting as a representative for Telix’s clinical operation activities when collaborating with external stakeholders such as clinicians and partners.

**Why work at Telix?**

We are a dynamic, fast-growing biopharmaceutical company where employees have a shared purpose: to help people with cancer and rare diseases live longer, better quality lives. This is an exciting time for Telix and we are looking for like-minded, passionate professionals to join us on the journey.

No agency submissions will be considered for this role.
