**About Telix Pharmaceuticals Limited**

Telix is an Australian public company (ASX: TLX) headquartered in Melbourne with international operations in Europe, the US and Japan. Our vision is to be a leading, global biopharmaceutical company in the field of “theranostic” radiopharmaceuticals and we are currently developing a portfolio of clinical-stage products that address significant unmet medical needs in oncology and rare diseases.

**Description**

Telix is rapidly growing and we currently recruiting for an experienced Equipment Engineer to join the team at the Telix Manufacturing Solutions (TMS) Seneffe radiopharmaceutical facility. Reporting to the TMS General Manager (GM), the successful candidate will play a key role in the set up of the new facilities. This person will define and follow-up the equipment processes, performance, calibration and maintenance plan of the facility and act as RPO (Radiations Protection Officer) to assure compliance with all regulations.

Other key responsibilities will include:

- Setting the production equipment road map for the facility in partnership with the GM
- Providing direction and technical expertise in design and integration of pharmaceutical equipment
- Supervising and leading supplier performance to align with requirements and operational and strategic goals
- Managing technical aspects (URS/IQ/OQ/PQ preparation and performance) in compliance with GMP regulations
- Maintaining and implementing continuous improvement of business practices
- Ensuring policies and practices in place for the identification of TMS equipment risks are identified and robust
- Preparing timely and accurate TMS equipment performance and management reports
- Facility redevelopment: lead the supplier planning, designing, reviewing and implementation of TMS redevelopment activities including the submission and interaction with the relevant regulatory authorities.
- Complying with RPO responsibilities as defined by the (BVS/ABR – Association Belge de Radioprotection)

To be considered for the role, you must have a relevant tertiary degree and progressive experience as an Equipment Engineer (or equivalent) at a Radiopharmaceutical Manufacturing facility. Experience in a GMP environment and team leadership / management are also mandatory. Radiation protection (RPO) certification is preferred.

Applications must be in English.

This is an exciting time for Telix. Come join us on our mission to help patients with cancer live longer, better quality lives!

No agency submissions will be considered for this role.
