Type: 12-month contract (full time)
Location: Melbourne
Date: Immediate

About Telix Pharmaceuticals Limited

Telix is an Australian public company (ASX: TLX) headquartered in Melbourne with international operations in Europe, the US and Japan. Our vision is to be a leading, global biopharmaceutical company in the field of “theranostic” radiopharmaceuticals and we are currently developing a portfolio of clinical-stage products that address significant unmet medical needs in oncology and rare diseases.

Description

Are you looking for a challenging, 12-month contract in a dynamic environment? We are currently looking for a Finance ERP Analyst to oversee the development of Telix’s ERP. Reporting to the Director of Finance, this role will work with internal and external stakeholders to develop, define, gather, and update business workflow requirements to ensure the successful implementation of the final solution.

This is a one-year contract. In summary, key accountabilities will include:

- Representing the Finance team as a lead in the roll out of ERP applications as a Finance solution
- Working as part of the project team to lead the development of functional specifications which meet the desired outcome of system enhancement/development
- Leading, coordinating and facilitating business workflow workshops to capture, develop, define, and document business processes and procedure of systems and workflows
- As the expert, manage SAP B1 and all future ERP roll outs and act as first point of call for ERP-related issues
- Lead and manage the selection and roll out of the BI management reporting tool
- Meet with global user groups and key stakeholders to gather, analyse and validate business requirements
- Optimising and documenting new business processes, including validation of business benefits
- Present options for future state solutions to ensure successful implementation of deliverables
- Analysing workflow to create process maps and isolate areas of potential improvement
- Reviewing UAT test cases and validating the testing of systems and processes to ensure the overall efficiency, functionality, and user-friendliness of system enhancement/development to ensure appropriate regulatory requirements

We are looking for an individual who can easily partner with internal and external stakeholders to facilitate positive outcomes. Demonstrated experience in analysing business processes and procedures and knowledge of System Integration strategies & Systems Development Life Cycle are also crucial. To be successful in the role, candidates also require technical writing skills and exposure to crystal reporting. From a systems’ perspective, candidates must have experience of working with SAP B1. Previous experience with BPMN and Visio will be highly regarded.

This is an exciting time for Telix. Come join us on our mission to help patients with cancer live longer, better quality lives!

No agency submissions will be considered for this role.
