**About Telix Pharmaceuticals Limited**

Telix Pharmaceuticals Limited (“Telix”, the “Company”) is an Australian public Company (ASX:TLX) headquartered in Melbourne with operations in Europe, the US and Japan. Our mission is to be a leading, global biopharmaceutical Company in the field of “theranostic” radiopharmaceuticals and the Company is currently developing a mid-late stage pipeline of products in oncology and rare diseases.

**Description**

Reporting to the Executive Medical Director – US, this role the MSL serves as a field-based clinical and medical expert for the business. The individual will be responsible for appropriately engaging in medical and scientific exchange and gaining insights in support of Telix Pharmaceuticals’ products, research areas, and disease state of interest.

The MSL will be required to develop and maintain relationships with medical experts in the fields of oncology, urologists, radiologists and nuclear medicine and other medical disciplines related to the diagnosis and/or management of patients within the Company products. Through scientific exchange, the MSL will communicate and advance the scientific platform aligned with the overall medical communications and Medical Affairs strategies.

Every day will be different! Responsibilities may include:

- The identification and communication of research gaps, opportunities and relevant field intelligence to inform medical strategy
- Leveraging your expertise to enhance and broaden knowledge among internal and external stakeholders
- Attending medical/scientific meetings to represent Medical Affairs with KOLs and other HCPs
- Supporting cross-functional colleagues (commercial, marketing, clinical operations) in appropriate activities

This is a remote role, preferably based in Central USA, though regular interaction with stakeholders in international locations and local/regional/national travel is expected. To be considered, you will ideally have:

- An advanced scientific, healthcare or medical degree (PharmD, PhD, MD, RN).
- Experience as an MSL
- Experience in radiopharmaceuticals and/or oncology
- Demonstrated ability to build productive collaborations with medical experts.
- Knowledge of regulations and practices related to industry interactions with healthcare professionals.
- Valid driver’s license.

No agency submissions will be considered for this role.
