Job Description: GMP Process Engineer

Type: Full Time

Location: Seneffe

Date: Immediate

About Telix Pharmaceuticals Limited

Telix is an Australian public company (ASX: TLX) headquartered in Melbourne with international operations in Europe, the US and Japan. Our vision is to be a leading, global biopharmaceutical company in the field of “theranostic” radiopharmaceuticals and we are currently developing a portfolio of clinical-stage products that address significant unmet medical needs in oncology and rare diseases.

Description

Telix is rapidly growing and we currently recruiting for an experienced GMP Process Engineer to join the team at the Telix Manufacturing Solutions (TMS) Seneffe radiopharmaceutical facility. Reporting to the TMS General Manager (GM), this person will be responsible for the support of process systems for GMP manufacturing, process development, quality control, and warehouse operations. They will lead process engineering activities during tech transfers of new products into the manufacturing facility and provide continued support throughout manufacturing campaigns.

This successful candidate will also have an opportunity to create and maintain key relationships with other functional areas and to develop and promote engineering best practices. They will also hold responsibility for ensuring compliance with SOP's, safe work practices, and GMP regulations.

Other key responsibilities will include:

- Experiments' design, GMP activities execution and documentation in compliance with regulatory requirements
- Engineering of solutions, projects optimization and acquisition of process systems
- Development and management of working instructions, world class standards and process documents (SOPs)
- Continual improvement of the existing operation
- Working with manufacturing to investigate operational problems and implementing solutions
- Working with the engineering team to manage equipment development, including effective planned preventative maintenance by the operations teams

To be considered for the role, you must have a relevant tertiary degree and progressive experience as a Process Engineer (or equivalent) at a Radiopharmaceutical Manufacturing facility. Experience in a GMP environment and team leadership / management are also mandatory.

Applications must be in English.

This is an exciting time for Telix. Come join us on our mission to help patients with cancer live longer, better quality lives!

No agency submissions will be considered for this role.
