Suite 401, 55 Flemington Road
North Melbourne
Victoria, 3051
Australia

Job Description: Regional IT Manager
Type: Full Time
Location: United States
Date: Immediate

About Telix Pharmaceuticals Limited

Telix is an Australian public company (ASX: TLX) headquartered in Melbourne with international operations in Europe, the US and Japan. Our vision is to be a leading, global biopharmaceutical company in the field of "theranostic" radiopharmaceuticals and we are currently developing a portfolio of clinical-stage products that address significant unmet medical needs in oncology and rare diseases.

About The Role

This is a newly created role due to the rapid growth at Telix. Reporting to the CFO, Americas, the Regional IT Manager will be responsible for defining and supporting the IT systems, infrastructure, and hardware required to support Telix's growth within the US. This role will act as a business enabler, providing strong support to stakeholders in the Americas region. This role will also be required to work closely with global IT and third-party contractors. It is expected that this role (and team) will grow over time. Accountabilities are broad and include:

- Leading IT projects in conjunction with the business to design and deploy new IT systems and services in the region
- Monitoring performance of services and systems and making recommendations for improvements
- Planning and budgeting for regional IT
- Helping to define IT infrastructure strategy, architecture, and processes
- Analyzing business requirements by partnering with key stakeholders across the Americas to develop solutions for IT needs
- Managing vendors and developing strategies for regional support services, new hardware and software
- Troubleshoot hardware and software issues related to internal IT
- Developing tailored systems training and training plans and ensuring appropriate user access and controls in line with Financial and Regulatory compliance requirements.
- Build team and individual capabilities, ensuring personal effectiveness for work in current and future roles.

About You

You hold a tertiary qualification in IT, Computer Science, or Engineering, and/or equivalent practical experience. You have proven experience in a corporate environment and can demonstrate your knowledge in cross-functional IT management methods and techniques. Ideally, you also hold professional IT Certifications such as: Microsoft MCP, MCSA, or MCSE, Cisco CCNA, or VMware VCP will be highly regarded. You understand TCP/IP Networking, security and wireless protocols. IT project management experience will be highly regarded.

You are comfortable managing through ambiguity, taking ownership for decisions, and operating in a fast-paced cross functional team environment. You have effective presentation and analytical skills, the ability to negotiate and strong customer service orientation.

You are willing to work collaboratively with global team members across multiple time zones and comfortable with building relationships with internal and external stakeholders.

Why work at Telix?

We are a dynamic, fast-growing biopharmaceutical company where employees have a shared purpose: to help people with cancer and rare diseases live longer, better quality lives. This is an exciting time for Telix and we are looking for like-minded, passionate professionals to join us on the journey.

Agency support is not required for this role and no submissions will be considered.
