Victoria, 3051
Australia

Job Description: Director, Isotope Supply Chain and Manufacturing

Type: Full Time

Location: United States

Date: Immediate

About Telix Pharmaceuticals Limited

Telix Pharmaceuticals Limited ("Telix", the "Company") is an Australian public Company (ASX:TLX) headquartered in Melbourne with operations in Europe, the US and Japan. Our mission is to be a leading, global biopharmaceutical Company in the field of "theranostic" radiopharmaceuticals and the Company is currently developing a mid-late stage pipeline of products in oncology and rare diseases.

About the Role

This is a newly created role borne out of growth at Telix. This position will be responsible for developing manufacturing and operational plans to support the Group's clinical and commercial radioactive isotope supply chain agreements that support the development and commercial assets in collaboration with the Program Management team, Regional COO's and the SVP Global Manufacturing and Operations.

The role will support the development and implementation for Isotope Contract Manufacturing (ICM) execution and strategy. The incumbent will partner with contract manufacturers to ensure quality, delivery and cost meet expectations and serve as liaison between company and the Isotope Contract Manufacturer network. This role will also provide oversight to the manufacturing, quality and development of products performed ECM's and develop and sustain ICM strategy to be used internally and externally. The incumbent will also be expected to manage issues, support quality investigations and non-conformances and to lead performance business reviews with suppliers/contracting organizations.

About You

You are ideally based in Indianapolis and hold a BA or BS degree in Engineering, Chemistry or another relevant field. You can demonstrate progressive experience in cGMP Manufacturing, Contract Manufacturing or Quality and have direct experience in radioisotope manufacturing / supply chain and/or radiopharmaceuticals. You are experienced in working with International Contract Manufacturing Organizations and open to travel domestically and internationally (approximately 30%).

You are a strong communicator and able to work well to competitive priorities and objectives. You have a global mindset and enjoy collaborating with global team members (across multiple time zones). You enjoy planning, creating, and strategizing and are a confident problem solver and decision maker. Above all, you are passionate about your work and committed to Telix's mission.

Why work at Telix?

We are a dynamic, fast-growing biopharmaceutical company where employees have a shared purpose: to help people with cancer and rare diseases live longer, better quality lives. This is an exciting time for Telix and we are looking for like-minded, passionate professionals to join us on the journey.

No agency submissions will be considered for this role.
