**About Telix Pharmaceuticals Limited**

Telix is an Australian public company (ASX: TLX) headquartered in Melbourne with international operations in Europe, the US and Japan. Our vision is to be a leading, global biopharmaceutical company in the field of “theranostic” radiopharmaceuticals and we are currently developing a portfolio of clinical-stage products that address significant unmet medical needs in oncology and rare diseases.

**Description**

Telix is rapidly growing and recruiting for an experienced *Supply Chain and Logistics Manager*. Reporting to the Director, Supply Chain and Logistics, the successful candidate will play a critical role in assisting product managers and other key internal stakeholders in matters relating to the production and distribution of clinical and commercial goods throughout the assigned regions in compliance with cGMP and cGDP requirements. The Supply Chain and Logistics Manager will:

- Oversee the maintenance of the customer database, the distribution of clinical and commercial products and third-party logistics providers
- Coordinate customer orders, manage the inventory of supplies, materials, and finished goods, and implement and optimize role-related standard operating procedures, work instructions and quality records for the assigned regions.
- Work with product managers, internal manufacturing teams, and other key internal and external stakeholders to plan and implement the overall supply chain strategy for the assigned region
- Day-to-day supply chain activities with CMOs and other vendors to ensure compliance with production and distribution deadlines
- Participate in the review of forecasts and production planning
- Establish KPIs for measurement, comparison and evaluation of factors affecting the supply chain
- Assist teams in other regions as needed to ensure production & distribution deadlines are met.

To be considered for the role, you must have a relevant tertiary degree in supply chain, logistics, business administration, or related field of study and progressive experience in the field of supply chain and/or logistics, preferably involving medicines or medical devices. Experience with radiopharmaceuticals will be highly regarded. We are also looking for someone with strong written and verbal skills and confidence in building and maintaining working relationships. Working knowledge and experience using an ERP is essential. Experience using SAP Business One is desirable. Current certification in IATA Dangerous Goods / Hazardous Materials is desirable, but not mandatory.

We are looking for someone able to travel domestically and overseas, approximately 10-20%.

This is an exciting time for Telix. Come join us on our mission to help patients with cancer live longer, better quality lives!

No agency submissions will be considered for this role.
