Job Description: Vice President of the CAIX Program

Type: Full Time

Location: Melbourne, Australia

Date: Immediate

About Telix Pharmaceuticals Limited

Telix Pharmaceuticals Limited ("Telix", the "Company") is an Australian public Company (ASX:TLX) headquartered in Melbourne with operations in Europe, the US and Japan. Our mission is to be a leading, global biopharmaceutical Company in the field of "theranostic" radiopharmaceuticals and the Company is currently developing a mid-late stage pipeline of products in oncology and rare diseases.

Description

We are seeking a passionate leader for this newly created position. The *Vice President of the CAIX Program* will lead the product portfolio management team through the creation, implementation, management and execution of product development plans encompassing the key program areas of manufacturing, non-clinical, clinical, regulatory and commercialisation.

This is an exciting opportunity to work as part of a cross-functional team to create product development and commercialisation plans for the Telix product portfolio. The successful candidate will be able to leverage and develop their commercial, leadership and technical experience with an organisation committed to our mission to help patients with cancer live longer, better quality lives.

Other role responsibilities include acting as the primary point of contact for the program and ensuring that good communication is maintained both internally and externally.

To be considered for this role, applicants must have:

- Postgraduate qualifications in science or life sciences
- Progressive pharmaceutical/biotechnology industry experience including direct experience in drug development
- An understanding of the regulatory environment in the US, EU and APAC
- Experience working as part of a cross-functional team
- Demonstrable people, project and financial management experience

No agency submissions will be considered for this role.
