Job Description: Product Manager, Prostate Cancer Portfolio

Type: Full Time

Location: Indianapolis, Liege or Melbourne

Date: Immediate

About Telix Pharmaceuticals Limited

Telix is an Australian public company (ASX: TLX) headquartered in Melbourne with international operations in Europe, the US and Japan. Our vision is to be a leading, global biopharmaceutical company in the field of “theranostic” radiopharmaceuticals and we are currently developing a portfolio of clinical-stage products that address significant unmet medical needs in oncology and rare diseases.

Description

Telix is still growing and looking for a *Product Manager, Prostate Cancer Portfolio* to join our team. This is a newly created role, working directly alongside the Vice President, Product Management. The successful candidate will be responsible for product planning focusing on market size, global strategy, R&D, new products, and lifecycle management. Using their expertise and understanding of the prostate cancer market, they will have the opportunity to set a portfolio vision and strategy and work within the Product Portfolio Management team to drive product development to create and leverage business opportunities. Key accountabilities will include:

- Understanding market dynamics, insights and drivers to anticipate market trends and to help develop and guide Telix’s innovation strategy
- Conducting market analysis to improve strategic decisions around the future product portfolio
- Identifying threats and opportunities in relation to products/ingredients to meet market needs
- Working within the Product Portfolio Management team to develop product innovation strategies as well as strategic roadmaps to guide idea development and prioritisation and ensuring alignment with Telix’s global product development strategy
- Working cross functionally through the product development phase and developing final product plans and product packs.
- Contributing to post launch review and analysis to capture learnings.

To be considered for the role, candidates require tertiary qualifications in marketing, business and/or life sciences and must demonstrate progressive experience in sales/marketing/product management in the pharmaceutical/biotechnology industry. More specifically, candidates will have worked with a focus in imaging, radiopharmaceuticals or oncology, preferably in prostate cancer. Applicants will also need to demonstrate an ability to understand market segments and customer needs and effectively translate into clear marketing requirements for product development. Strong analytical skills, flexibility in dealing with changing priorities and a logical, facts-driven approach are highly desirable skills.

This is an exciting time for Telix. Come join us on our mission to help patients with cancer live longer, better quality lives!

No agency submissions will be considered.
