Job Description: Global Director of Quality
Type: Full-time
Location: Melbourne, Australia
Date: Immediate

[About Telix Pharmaceuticals Limited](#)

Telix Pharmaceuticals Limited (“Telix”, the “Company”) is an Australian public Company (ASX:TLX) headquartered in Melbourne with operations in Europe, the US and Japan. Our mission is to be a leading, global biopharmaceutical Company in the field of “theranostic” radiopharmaceuticals and the Company is currently developing a mid-late stage pipeline of products in prostate, kidney and brain (GBM) cancer.

[Description](#)

The Global Director of Quality is responsible for providing expert contribution to the continued development, management and implementation of the Quality Management System at Telix Pharmaceuticals.

The Global Director of Quality will work across the broad spectrum of Telix’s radiopharmaceutical pipeline which includes activities in manufacturing, pre-clinical, clinical, regulatory and general operations ensuring quality across the entire company.

The role is to be based in Melbourne, Australia. The Global Director of Quality reports to the Group Chief Operating Officer but is expected to have extensive interaction with key staff in Europe the USA and other international locations.

Key Objectives: To contribute to the achievement of the company’s strategic goals through the leadership, management and continual improvement of the company’s global Quality Management System (QMS). To provide leadership and insight into Quality related issues relevant to the company. To ensure all Quality related activities are conducted within required timelines and budget, to the highest standards of Good Laboratory Practice (GLP), ICH guidelines, Good Clinical Practice (GCP) and according to regulatory guidelines, laws and Standard Operating Procedures (SOPs).

Key Accountabilities:

1. Develop and lead the implementation and continuous improvement of the Group-wide QMS
2. Audit, qualification and review of key service providers, manufacturing partners and supply chain
3. Lead global quality function. Collaborate with and provide functional leadership and support to global team members on quality function.
4. Collaborate closely with the President and COO of each Telix jurisdiction for an efficient and effective global quality management process
5. Oversight of global contractors in relation to Quality matters, including in relation to regulatory submissions in the US, EU, Japan and Australia.
6. Collaborate with global regulatory counterparts to ensure regulatory requirements are applied accordingly
7. Develop and manage appropriate systems compliant with GMP regulations
8. Develop and manage appropriate Quality Reporting systems

9. Ensure the release and handling of product for use in clinical trials and market launch is in compliance with documented procedures and specification
10. Ensure the testing, storage delivery, return and handlings of clinical trials samples is in accordance with documented procedures
11. Ensure the identification and management of risks are robust and appropriate
12. Management reporting
13. Team leadership and development
14. Personal development – maintain Quality knowledge and make recommendations for professional development and training

Education and Experience:

- PhD qualifications
- 7-10 years of Quality experience at global pharmaceutical/biotechnology level
- Team leadership
- Experience in radiopharmaceuticals preferred

Competencies:

- Demonstrated ability to function well in a collaborative team environment
- Ability to plan, create, strategize and drive execution of multiple projects under tight timelines
- Ability to prioritize and manage time effectively
- Strong organizational and interpersonal skills
- Demonstrated proficiency in Microsoft Office (including Outlook, Word, PowerPoint, Excel)
- Excellent oral and written communication skills
